Sara Dari, Executive assistant

Our service portfolio:

- Chrome optics
- Mirror lacquer
- PS metal: cold-sprayable metal surfaces
- Special coatings and effect coatings
- Color glazes for metal and carbon
- Soft-touch coating
- High-End-Finish
- Prototypes building/processing
- Individual pieces and small series

P.S. Oberflächen: Manufacturer, problem solver, idea generator

Simply putting color on an object? At P.S. work goes far beyond this ... Combining great craftsmanship and comprehension of design, we operate on the interface between creative ideas and technical implementation as a service provider in the product development process.

Inspiration & Orientation

In the midst of our material exhibition with more than 2,000 surface samples, we discuss project approaches with our customers from the fields of architecture, artwork and industry and surprise you with innovative and feasible ways to shape and design new objects.

Construction & Coating Services

If you are responsible for prototypes or small batch series we keep your back free in terms of construction and surface coatings. You determine the parameters and we take care of the rest - our spectrum at a glance:

(Extra-)ordinary coating processes

Chrome optics

- perfect display of chrome surfaces
- reflective surfaces for prototypes, models, design/room objects, artworks

PS spraying metal

- real metal surfaces by cold spraying process
- thin metal skin on any surface
- stainless steel, brass, bronze, copper, ...
- polished, patinated, sealed

Soft touch

- touch-sensitive surfaces for interior use
- switches, moldings, handles, shelf spaces ...
- any colors and structural effects

Special/effect lacquering

- color glazes for mirrors, metal and carbon parts
- mirror, piano, leather effect paints ...
- functional thermal/photo sensible paints
- prism, neon, conductive, crack paints ...

Customers & Applications

Industry / Prototyping / Modeling

- if it must be quick or specific
- for service providers in rapid prototyping
- for R&D units in the industry

Architecture / Design / Shopfitting

- for individual and innovative solutions
- design options for creative work
- impulses for space and product designers

Art

- surface treatment, coating and production of art projects
