

## PR info

P.S. Oberflächen GmbH, Sassenberg/Westfalen

### Coating Competence on highest level

In the last 25 years P.S. Oberflächen GmbH has become a trademark as a specialized paint shop employing special coatings e. g. for prototypes, small batch series productions, design objects or art work in Germany and around. Together with their team the two managing partners Moritz Haring und Peter Stücker close a wide gap in the industry.

With highest quality expectations and a profound understanding of design and arts the coating experts represent the interface between designers, artists, industrial engineers and marketing/sales people. As customer of P.S. you get more than just a coated surface – you get the best and most reasonable solution for you product/object in terms of individuality, function, optics and practicability.

To end up with the perfect product surface P. S. provides comprehensive experiences in all fields of product and object application as well as project solutions. With close relations to the leading coating suppliers and at the same time small, highly-specialized paint manufacturer P. S. develops and delivers a steady flow of new exciting and trendsetting coatings solutions and processes.

Actual focus areas of P.S. Oberflächen GmbH:

#### Chrome Optics

Perfectly appearing chrome and 3Q7-optics are being produced by application of a spraying process for prototypes, models, design objects, artwork, etc.

#### Cold-Sprayable Real Metal:

Cold and liquid metal is applied by spraying on any imaginable surface. The object looks and feels like real metal. It has got almost all relevant properties of metal. It IS metal.

#### Soft-Touch-Paint

Applying Soft-Touch-Paint we create surfaces with optical AND haptical effects. The coated object may feel velvety soft or it imitates high-class leather optically and haptically.

#### Tinted Carbon

Upgrading Carbon parts with unique effects. The carbon fibres are being enhanced by user-defined colours and grade of glossiness. A special primer and clear coat ensure durability und light-resistance.

#### High-End-Finish:

With given construction data and design we prepare the substrate and specially treat the objects with regard to the perfect finish. The final finishing touch is delivered by precision grinding, high-gloss polishing or nano-sealing
