- Individual pieces and small series

Idea provider, partner & manufactory

We are service providers in product development on the interface between Creation and implementation, with craftsmanship Skill and understanding of design.

Inspiration & guidance

Our P.S. Sample exhibition supported the creative ones Process with more than 3,000 surfaces for customers from architecture, Design, art and industry.

Construction & surface coating

When it comes to the production of one-offs and small series, we support our customers when it comes to design and coating. You determine the parameters, we take care of the processing.

Surfaces,

that mean something...

Industry, prototyping & model making

Our work begins when your ideas take shape. We implement the designs of R&D units, prototypers, artists and model builders in your projects.

Architecture, design & shopfitting

The dialogue between object and space determines the ambience. Unique impressions of these components are achieved through innovative surfaces.

Arts

The content of a work of art is conveyed very strongly through its surface. We support this communication process through unique and individual coatings.
